In today's world, it's more important than ever to have reliable security measures in place.

The solar and wind powered mobile Scout Crime Prevention Platform can indicate when something is wrong, track it, and prevent it before it happens."

Isaac Dunifon

Traditional surveillance systems offer after-incident footage, which can be expensive and difficult to maintain. Here Infinite Protection comes to the rescue with its [state-of-the-art mobile surveillance trailers](#) marketed as Scout Crime Prevention Platform.

By giving real-time situational awareness, the Scout Crime Prevention Platform offers police, communities, and businesses the ability to create an all-encompassing crime prevention system saving their time and money. Scout is

the world's first "universal crime prevention technology" that utilizes solar or wind-powered components and a customized detection algorithm to "see" and detect crime before it happens. By maximizing technology's ability to collect, analyze and share data, Scout can more effectively monitor and protect against potential threats before crime becomes a severe problem.

Scout is a crime prevention platform designed to protect people, property, and assets with seven

customization options. The Scout mobile surveillance trailer integrates the latest in video surveillance, rapid deployment, data analysis, and pole surveillance technology into a single system. By removing the need for multiple units and seamlessly integrating multiple AI engines, the Scout Crime Prevention Platform is creating safer environments worldwide. No need for an added security team. Scout, watch, and report suspicious activity —from anywhere, anytime!

Public safety has become a significant concern for many entities, institutions, organizations, and businesses, both small and large. With the Scout Trailer, businesses will always be able to bring superior security measures without the expense of leasing or buying permanent structures. With the ability to be a portable Crime Prevention Platform (CPP), the unit offers surveillance, detection, and deterrence capabilities. From business property protection to personal crime prevention, Scout works on-site to provide a unique and effective detection solution to the issues plaguing modern society today.

Real-Time Crime Prevention Platform

Mobile License Plate and Facial Recognition Trailer

When asked about the uniqueness of the trailer, the President, Isaac Dunifon, said, "Scout Technology Systems are the next generation of crime prevention products that turn solar and wind energy into data and information to drive down your costs and increase your crime prevention abilities. Utilizing technology and advanced security measures, we are proud to offer the most technologically advanced fully integrated International Mobile Surveillance Trailer to help provide safety and technology for businesses and people."

From foot patrol to fieldwork, the mobile trailer gives complete observation and reporting surveillance over the entire property. Scout Crime Prevention Platform can indicate when something is wrong, track it, and prevent it before it happens. No matter how large or small an

organization is, the Scout Crime Prevention Platform can help make it safer.

With its [advanced surveillance cameras and real-time monitoring capabilities](#), the trailer can detect potential threats and alert authorities before a crime occurs. One of the key features of the Scout trailer is its ability to capture high-definition video footage from all angles. This allows law enforcement to identify suspects and gather evidence in the event of a crime. The trailer also includes advanced lighting and audio systems that can be used to deter potential perpetrators and alert authorities to any suspicious activity.

In addition to its crime prevention capabilities, the Scout trailer is also a valuable resource for managing large events. Its [onboard command center](#) allows authorities to coordinate efforts and respond quickly to emergencies. And with its rugged design and durable construction, the trailer is built to withstand the most challenging conditions.

Unlike stationary, fixed surveillance systems that can only capture a crime after it occurs, The Scout will deter a criminal from entering the property. But the Scout trailer relies on more than reactive measures to prevent crime, it also includes advanced analytics that can predict criminal behavior and alert authorities of potential threats. This allows law enforcement to be proactive in keeping communities safe.

Whether planning a large public event or simply looking for an extra layer of security for your business, the Scout trailer is an effective and reliable solution. So why wait? Invest in the Scout Technology line today and take the first step towards a safer, more secure future.
