

Aircraft Seat Material Market Revenue to Cross US\$150.1 Million by 2026 | IndustryARC

The upsurge in the need for maintenance and repair of aircraft in the aerospace sector is the prime factor driving the Aircraft Seat Material Market growth.

HYDERABAD, TELANGANA, INDIA, January 16, 2023 /EINPresswire.com/ --

IndustryARC, in its latest report, predicts that [Aircraft Seat Material Market](#) is estimated to reach \$150.1 million by 2026, witnessing a CAGR 3.5% from 2021 to 2026. The components used to build the seating arrangement for comfortable

passenger accommodation on a flight are known as aircraft seating materials. Airline seats are intended to be lightweight, yet powerful and fire-resistant at the same time, considering passenger convenience as well. With the growing number of carriers and their ongoing efforts to update and expand their fleet, the aircraft seating material market is experiencing healthy growth. The report offers an extensive analysis of the market, its major segments, growth factors, trends, drivers and challengers, key players and more.

Key Takeaways:

This IndustryARC report on the Aircraft Seat Material Market highlights the following areas –

- Europe dominates the Aircraft Seat Material Market, owing to the increasing demand for aircraft in the region. The demand for aircraft is increasing in the region owing to the increasing population and increasing per-capita income.
- Fiberglass, a composite material made of glass fibers and polyester resin, is used for various

Market Research Reports, Business Consulting
Services & Analytics

structural and non-structural items. Owing to its ability to manufacture complex curved shapes it is often used as the aircraft seat material.

- Neoprene is a synthetic rubber material designed to be flexible, durable, resilient, and very resistant to failure and breakdown by compression and water. Owing to the durable quality of neoprene it is considered very useful in seating and other applications.

Segmental Analysis:

By Material Type:

The structure segment held the largest share in the Aircraft Seat Material Market in 2020 and is growing at a CAGR of 3.9% by revenue during 2021-2026. Aerospace structures are often made up of thin-walled structures like plates and shells, which can become dynamically unstable when subjected to high-speed airflow on the outer surface and at a certain critical speed.

By Seat Class:

The business class segment held the second largest share in the Aircraft Seat Material Market in 2020 and is growing at a CAGR of 4.2% by revenue during 2021-2026. Business-class continues to be one of the most profitable aviation industries. Airlines are increasingly pushing luxury travelers, and many business-class fares are now merely so great that first-class companies are completely withdrawing them.

By Geography:

Europe held the largest revenue share in the Aircraft Seat Material Market in 2020 up to 31.5%. The improving economic conditions and increase in airplane fleet are considered to be the major driver for the market growth in the European region. According to the International Trade Administration (ITA), in 2019, the French aerospace industry recorded sales revenue of €74.3 billion (US\$83.4 billion), up 13% from the previous year.

Competitive Landscape:

The top 5 players in the Aircraft Seat Material Industry are -

1. Haeco Americas (Swire Pacific Limited)
2. Safran S.A.
3. Jamco Aircraft Interiors Company
4. Recaro Aircraft Seating

5. Singapore Technologies Aerospace Ltd.

Why Choose IndustryARC?

IndustryARC is one of the leading market research and consulting firms in the world. It produces over 500 unique market reports annually. If you are looking for a detailed overview of a particular market, you can simply connect with the team at IndustryARC. You can not only buy your preferred market report from the website, but also get personalized assistance on specific reports.
