## Trending Sterilization Equipment And Disinfectants Market Trend

Sustainable solutions such as repeat sterilization of medical equipment including personal protective equipment are expected to boost the market during the forecast period. As there is a shortage in the supply of PPE to the hospitals offering services to COVID-19 patients, few companies have come up with repeat sterilization of used PPE like gowns and masks. In April 2020, San-I-Pak, a California-based company that manufactures equipment for high-end waste treatment, has sterilization equipment that sterilizes used medical equipment like PPE including isolation gowns, 3M safety glasses, and several non-branded polycarbonate glasses, and surgical masks. Similarly, Battelle Memorial Institute, a non-profit research organization, is aiming to re-using the N95 respirator masks by sterilizing the N95 respirator masks as long as the masks are not made of cellulose. Battelle has been funded with \$400 million by the Defense Logistics Agency under US HHS to provide decontamination of N95 across 60 sites in the USA. Following the scarcity of PPE, decontamination or sterilization of PPE rather than replacing this vital medical equipment is expected to be a growth area.

## Sterilization Equipment And Disinfectants Market Segments

- By Product Type: Sterilization Equipment, Disinfectants
- By Method: Physical Method, Chemical Method, Mechanical Method
- By End-User: Hospitals And Clinics, Pharmaceutical Companies, Clinical Laboratories
- By Geography: The global sterilization equipment and disinfectants market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.
