[Trending Biosimilar Hormones Market Trend](#)

Key players operating in the biosimilar hormones market are undertaking various strategic

initiatives such as new product launches in untapped regions to make the drug accessible to a large population. The companies are focusing on launching their products in various locations to boost sales and maximise profits. For instance, in February 2022, Alvotech Holdings S.A., a Luxembourg-based biopharmaceutical company specialising in the development of biosimilar medicines, announced partnerships with Fuji Pharma Co. Ltd., a Japan based pharmaceutical company, to develop biosimilar drug candidates in Japan. Through this partnership, both companies have decided to add new elements to their strategic alliance for the creation and marketing of biosimilar medicines in Japan.

Biosimilar hormones refer to the hormones included in the product that are chemically identical to those produced by your body. In fact, it's possible that the hormones in bioidentical drugs are identical to those used in conventional hormone therapy. They are used to treat people whose hormone levels are low or out of whack.
