Trending Biosimilar Therapeutic Peptides Market Trend

During the forecast period, the biosimilar therapeutic peptides market is expected to witness growth in research collaborations as well as research funding approvals. Collaborations with other companies and organisations are being prioritised by key companies in order to improve research and development, expand product portfolios, and expand geographical reach. For instance, in January 2020, a UK-based biotechnology company focusing on developing a class of therapeutics based on its proprietary bicyclic peptide technology announced a collaboration with Cancer Research UK to develop BT7401, a new bicyclic immuno-oncology candidate. Cancer

Research UK will fund and sponsor the development of a new candidate. In addition to this, Sapience Therapeutics, Inc., a US-based biotechnology company focused on the research & development of peptide therapeutics, announced a research collaboration with the University of Bath (UK) to develop and discover new therapeutic agents for oncology applications. Hence, research collaborations to develop new therapeutic peptides are a major trend in the market.

### Biosimilar Therapeutic Peptides Market Segments

- By Route Of Administration: Parenteral Route, Transdermal Route, Other Route Of Administrations
- By Application: Cancer, Cardiovascular, Central Nervous Systems, Metabolic Disorders, Infection, Hematological Disorders, Gastrointestinal Disorders, Dermatology, Respiratory Disorders
- By Type: Innovative, Generic
- By Geography: The global Biosimilar Therapeutic Peptides market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.

Read more on the global Biosimilar Therapeutic Peptides market report at:

<https://www.thebusinessresearchcompany.com/report/biosimilar-therapeutic-peptide-global-market-report>

Biosimilar therapeutic peptides refer to a peptide drug that is used in place of or in addition to peptide hormones when endogenous levels tend to decline. Therapeutic peptides that are biosimilar have applications in the treatment of cancer, metabolic, pulmonary, cardiovascular, and other illnesses.
