

# Global Poly-Vinyl Chloride Market Is Projected To Grow At A 7.6% Rate Through The Forecast Period

*The Business Research Company's Poly-Vinyl Chloride Global Market Report 2023 – Market Size, Trends, And Market Forecast 2023-2032*

LANDON, GREATER LONDON, UK, January 16, 2023 /EINPresswire.com/ -- The Business Research Company's global market reports are now updated with the latest market sizing information for the year 2023 and forecasted to 2032

The Business Research Company's "Poly-Vinyl Chloride Global Market Report 2023" is a comprehensive source of information that covers every facet of the poly-vinyl chloride market.

As per TBRC's poly-vinyl chloride market forecast, the poly-vinyl chloride market size is predicted to reach a value of \$119.4 billion by 2027, rising at a significant annual growth rate of 7.6 percent through the forecast period.

The Business Research Company's global market reports are now updated with the latest market sizing information for the year 2023 and forecasted to 2032"

*The Business Research Company*

The growth in the poly-vinyl chloride market is due to increased demand from industries such as construction, health care, and packaging. Asia-Pacific region is expected to hold the largest poly-vinyl chloride market share. Major players in the poly-vinyl chloride market include Westlake Chemical Corporation, Shin-Etsu Chemical Co., INEOS Group Ltd., LG Chem, Formosa Plastics Corporation.

Trending [Poly-Vinyl Chloride Market Trend](#)

Poly-vinyl chloride manufacturing companies are increasingly implementing the new "molecular orientation" technology to improve the physical and mechanical properties of the PVC produced. Molecular orientation is a manufacturing method that increases the flexibility and resistivity of PVC from fatigue and impact. Under certain pressure, temperature, and speed conditions, molecular technology aligns the randomly arranged molecules in a normal PVC in the same direction. The new alignment improves the strength and ductility of the PVC pipes, creating new PVC-O pipes. For instance, Molecor uses molecular orientation to produce TOM® PVC-O pipes. These pipes are resistant to low temperatures and have high resistance to cracks or impacts.

### Poly-Vinyl Chloride Market Segments

- By Product Type: Rigid PVC, Flexible PVC, Low-smoke PVC, Chlorinated PVC
- By Application: Pipes & Fittings, Film & Sheets, Wire & Cables, Bottles, Profiles, Hoses & Tubing, Other Applications
- By End User Industry: Building & Construction, Automotive, Electrical & Electronics, Packaging, Footwear, Healthcare, Other End Use Industries
- By Geography: The global poly-vinyl chloride market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.

Polyvinyl chloride is a white synthetic organic compound available in powder form or granules with a high density and high impact strength. PVC is commonly used in construction as insulation on electrical wires. It is also blow-molded into clear, transparent bottles.

Poly-Vinyl Chloride Global Market Report 2023 from TBRC covers the following information:

- Market size data for the forecast period: Historical and Future
- Market analysis by region: Asia-Pacific, China, Western Europe, Eastern Europe, North America, USA, South America, Middle East and Africa.
- Market analysis by countries: Australia, Brazil, China, France, Germany, India, Indonesia, Japan, Russia, South Korea, UK, USA.

Trends, opportunities, strategies and so much more.

The Poly-Vinyl Chloride Global Market Report 2023 by The Business Research Company is the most comprehensive report that provides insights on poly-vinyl chloride global market size, drivers and trends, poly-vinyl chloride global market major players, competitors' revenues, market positioning, and poly-vinyl chloride market growth across geographies. The poly-vinyl chloride market overview helps you gain in-depth insights on opportunities and strategies. Companies can leverage the data in the report and tap into segments with the highest growth potential.
