sharing services and autonomous vehicles. However, there are also numerous risks that could impede this growth, such as congestion and increasing pollution levels. However, the market risks associated with transit can be significant. These risks include security threats, accidents, and congestion. Transit operators must also contend with a variety of economic factors, such as fuel prices and inflation. In addition, transit operators may be subject to political pressures. All of these factors can affect transit ridership rates and revenue. In order to minimize these risks, transit operators must have a clear understanding of their business environment. They must also make sure that they are well prepared for any potential disruptions or challenges.
