*The major companies profiting from the growth of the decene market are DowDuPont Inc. (United States), BASF SE (Germany)*

ISLE OF MAN, ISLE OF MAN, January 16, 2023 /EINPresswire.com/ -- [1 Decene Market](#) Value and CAGR

During the forecast period, the 1-decene market is expected to grow at an annualized CAGR of over 3%. A major factor driving 1-decene's growth will be the increasing demand for chemical intermediates from the surfactants segment. Nevertheless, unfavorable conditions arising from the sudden outbreak of COVID-19 are expected to hinder the growth of the market studied.

## 1 Decene Market Growth Drivers and Risks

The increasing utilization of 1-decene in the production of polyalphaolefin (PAO) is creating a positive outlook for the market. The automotive and manufacturing industries use PAO as transmission fluids, compressor fluids, lubricants that are added to lubricants, and gear oils.

In addition, the rising consumption of packaged food products is acting as another growth-inducing factor, as 1-decene is used to manufacture polymers, such as polyethylene, which are used to pack these products. Their use in the food and beverage (F&B) industry has increased due to their applications as food additives, glazing agents, and polishers.

There is a risk that electric vehicles may not be adopted as easily as they should because of their high costs. In addition, fluctuating raw material costs result in high production costs at times, which may lead to lower profit per product and hamper revenue growth in some cases.
