

# Sponsorship and Exhibition Opportunities available for the 4th Annual AI in Drug Discovery Conference 2023

*SAE Media Group reports: Sponsorship and advertising packages are available for the 4th Annual AI in Drug Discovery Conference in London.*

LONDON, UK, January 16, 2023

/EINPresswire.com/ -- With the recent pandemic highlighting the need for rapid drug discovery, AI has become an area of increased interest. This is driven by the ability to discover [drugs](#) through the use of machine and deep

learning. The current challenges within the drug discovery industry include the significant time consumption and expenses involved. This conference will discuss the solutions to these problems with presentations and updates from leading industry experts.

AI in drug discovery is leading the way into a shorter, cheaper and more successful R&D era where compound generation is automated, drug synthesis is predictable and undruggable diseases are finally being targeted.

The conference will take place on 13 – 14 March 2023, in London, UK.

Visit the website at <http://www.ai-indrugdiscovery.com/PR3einnews> to download the brochure and view the full programme
