Erythropoietin (EPO) refers to a glycoprotein hormone that naturally induces the generation of red blood cells and is produced by the kidney's peritubular cells. Red blood cell scarcity, or anaemia, is treated with it. Weakness, weariness, and shortness of breath are signs of anaemia because red blood cells deliver oxygen to the tissues and organs.

Erythropoietin (EPO) Global Market Report 2023 from TBRC covers the following information:

- Market size data for the forecast period: Historical and Future
