

Laser Lipo Now Available in Stuart

Dr. Tred's Slim Body Laser Spa in Stuart is now offering laser lipo consultations. It helps people achieve a healthy lifestyle by reducing fat deposits.

STUART, FLORIDA, UNITED STATES, January 17, 2023 /EINPresswire.com/ -- As a chiropractor by trade, Dr. Tred helps people achieve a healthier lifestyle. Dr. Tred and his staff help people achieve a healthy lifestyle by reducing fat deposits through [laser lipo services](#), now available in Stuart.

Laser lipolysis is a non-invasive form of body sculpting. This procedure shrinks fat cells in a non-invasive way. Laser lipo is less complicated and less painful.

Dr. Tred Rissacher is now offering laser lipo consultations throughout Stuart, Saint Lucie, and Martin County. This service helps people with moderate or excessive weight gain lose inches and fat without harsh diets or invasive surgery.

Lipo suction or the fat-freezing procedure can be applied only one time in a matter of months, but Dr. Tred's laser lipo requires a series of 9 - 30 minute laser sessions followed by a whole-body vibration treatment. This plays a very helpful role in getting the desired results.

Laser Lipo Services in Stuart, Florida

Dr. Tred's Slim Body Laser Spa offers laser lipo in Stuart, Florida, United States, that provides 5 special benefits. These are:

- More convenient than surgery
- Shorter recovery period
- Fewer side effects
- Long-lasting, effective results
- Local services now offered in Stuart

[Laser Lipo services in Stuart](#) are More Convenient Than Surgery

A person who has lost weight through traditional liposuction surgery requires special care in the post-surgery period. The patient may even need to be placed in the high-dependency unit of the hospital and is in a lot of pain post-treatment. Often, patients may suffer from depression because of their physical condition.

Laser lipo can be performed without general anesthesia, and each session takes only about an hour to complete. Patients can go home immediately after the procedure. The body has not been cut into, and the procedure did not rip through cells, so the process is much more natural for the body to endure.

Laser lipo weight loss requires a very short period for healing and recovery. It may take 1-2 days for a patient to return to normal, but typically patients are back to work immediately following the procedure.

Other methods, especially surgery, require the patient to be inactive for a relatively long time. As a result, normal life is disrupted for some time.

Dr. Tred's Slim Body Laser Spa

Many complications and side effects can be observed in other fat-loss methods. In many cases, these side effects cause long-term problems. Dr. Tred's Laser Spa is now local to Martin County residents. While in the past, people may have had to drive to West Palm Beach for this type of service, those days are now gone.

Dr. Tred offers comfortable, lasting treatments that target fat cells. Patients rarely have side effects, but typical side effects may include slight swelling and tenderness of the skin caused by the laser. The risk of complications, side effects, or rejection is extremely low because the treatment does not kill the fat cells, it allows them to drain. This is easier on the body and actually gives a more natural, healthy aesthetic appearance.

Local, Long-lasting Results

Dr. Tred's local laser lipo services provided by Tred's Slim Body Laser Spa are exciting news for Saint Lucie and Martin County residents. It is now easier than ever to stay local and get the desired look.

Laser lipo can be used virtually anywhere on the body, including the face, cheeks, lips, breasts, and buttocks. Many, however, opt for mid-section services.
