

Veriff Awarded G-Cloud 13 Status by UK Government

Veriff now available on G-Cloud 13 Digital Marketplace for UK customers

LONDON, UK, January 18, 2023 /EINPresswire.com/ -- Veriff, a global [identity verification](#) provider, today announced it has officially joined the G-Cloud 13 [Digital Marketplace](#). The Crown Commercial Services (CCS), part of the UK Government Cabinet Office, has awarded Veriff their Cloud Software designation.

“

We look forward to continuing to support the UK government with identity verification to ensure that citizens can easily and safely access government services online.”

Manuel Solis III, Head of Global Partnerships at Veriff

G-Cloud 13 went live on November 9, 2022 and has since allowed Veriff’s new and existing UK Public Sector customers to easily access their cloud-based identification and verification services on their digital marketplace.

Government Cloud (G-Cloud) is a UK government initiative to ease procurement of cloud services by government departments and promote government-wide adoption of

cloud computing. G-Cloud comprises a series of framework agreements with cloud services suppliers, including Veriff.

“We are delighted that we have been selected to participate in the UK government's G-Cloud 13 framework. This marks further progress in our approach to supporting public sector organizations,” said Manuel Solis III, Head of Global Partnerships at Veriff. “We look forward to continuing to support the UK government with identity verification to ensure that citizens can easily and safely access government services online.”

The G-Cloud 13 framework is accessible by all UK government departments and bodies. Veriff’s inclusion enables rapid access to their proven global identity platform which protects departments and citizens from the risk of online fraud. Veriff’s excellent user experience makes citizens' enrollment and re-verification simple by providing actionable feedback to enable fast and accurate verification.
