

AMDETECH's iPro+ Screen Protectors for iPhones Guarantee Crystal Clear Vision

We are excited to introduce iPro+ to the market. Our goal is to provide our customers with the best mobile experience, and this is a step in that direction

PETRICH, BLAGOEVGRAD, BULGARIA, January 18, 2023 /EINPresswire.com/ -- [AMDETECH](#), a high-quality phone accessory provider, is offering fast delivery of its innovative, easy-to-fit iPro+ Tempered Glass Screen Protectors, engineered for premium protection for the iPhone range.

The company's exceptional [Tempered iPRO+ Glass](#) for iPhone 6 to 13 Pro series are available to be shipped to Greece, Bulgaria and Germany within three days of ordering. They are available at [Amdetech.com](#) and [Amazon.de](#).

AMDETECH's Acrylic+ technology is the latest innovation in glass protection materials for mobile phone screens and cameras due to its extremely high resistance to impacts, shocks, cracks, scratches and even dust.

Compatible with most iPhone cases, the screen protector has been precision cut by laser and designed to fit perfectly on the surface of a device for maximum coverage and ultimate protection.

With anti-scratch technology and iPhone clear vision, the transparent color of the Acrylic+ 9H, with a hardness and thickness of 0.3mm, guarantees not even the slightest variation of color distortion with the smallest range of gamma color on screen.

An AMDETECH screen protector comes with an easy-to-use DIY kit. The package includes two tempered glass protection screens, cleaning kits and a new alignment helping tool to enable easy application of the screen to the mobile device.

Now, iPhone users can easily add their own screen protector from AMDETECH at home without the need to pay enormous costs for the same service with a trip to a phone accessories retailer.

The AMDETECH screen protectors, from as little as €10 up to €12.50, are available from Amdetech.com and Amazon.de. Each product comes with a lifetime tech support warranty.
