

BREAKING NEWS: The Vice Fund (Symbol: VICEX)

DALLAS, TX, UNITED STATES, January 26, 2023 /EINPresswire.com/ -- On December 31, 2022, [the Vice Fund](#) (symbol: VICEX) was in the top 1% of Funds on a total return basis in its Morningstar Category for the year 2022 (out of 365 Global Large-Stock Blend).

Under normal market conditions, The Vice Fund (symbol: VICEX) invests at least 80% of its net assets (plus

borrowings for investment purposes) in equity securities of companies that derive a significant portion of their revenues from a group of vice industries that includes the alcoholic beverages, defense/aerospace, gaming, and tobacco industries. The Fund concentrates at least 25% of its net assets in this group of four vice industries (but no more than 80% of its net assets in any single industry). The Vice Fund has also added exposure to cannabis and psychedelics.

Morningstar uses the following step to calculate this rating:

1) Total Return: Calculate monthly total returns for the fund. Do an additional adjustment for tax-advantaged dividends where appropriate.

USA Mutuals, Advisors, Inc. President Paul Strehle says, "We are proud of our positive performance in 2022 against a year of mostly down equity funds, particularly in our Morningstar Category. We believe the new environment of central bank quantitative tightening may provide a new market regime, and we are very comfortable investing in historically value-oriented stocks."

IMPORTANT RISK INFORMATION:

Mutual fund investing involves risk; principal loss is possible. The Fund will concentrate its net assets in industries that have significant barriers to entry including the alcoholic beverages, tobacco, gaming and defense/aerospace industries, the Fund may be subject to the risks affecting those industries, including the risk that the securities of companies within those industries will underperform due to adverse economic conditions, regulatory or legislative

changes or increased competition affecting those industries, more than would a fund that invests in a wide variety of industries. The Fund invests in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. The Fund invests in smaller companies, which involve additional risks, such as limited liquidity and greater volatility. Derivatives may involve certain costs and risks such as liquidity, interest rate, market, credit, management and the risk that a position could not be closed when most advantageous. Investing in derivatives could result in losing more than the amount invested. If a security sold short increases in price, the Fund may have to cover its short position at a higher price than the short sale price, resulting in a loss.

"The Morningstar Rating for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods."
