Eco-friendly plasticizers are increasingly being used to prevent harmful phthalate plasticizers such as DOP, DBP, BBP, and DEP. Eco-friendly plasticizers have various properties such as

waterproofing with good electrical resistivity, weather resistance, better mechanical strength, and good heat stability. Due to these factors, phthalate plasticizers are being replaced with eco-friendly plasticizers. Eco-friendly plasticizers are polymer additives that improve a material's plasticity. The global eco-friendly plasticizer market is growing rapidly due to the increased demand for eco-friendly plasticizers to keep human health and the environment safe. These plasticizers come with low toxicity and good compatibility and are used in various applications, mainly in films and cable manufacturing, and are driving the growth of the plasticizer market.
