In recommending Mountain Peaks, Shantay H. wrote, "Dr. Durran and the rest of the staff here are willing to go above and beyond the call of duty. I am needing to see a specialist and the referral process is taking longer than I would like but they have been there every step of the way making at least as many calls as I have making sure the specialist has my information so we can move forward. They've probably actually made more calls than I have and they have kept me updated as best they can. Every time I've gone into the office they have all been super friendly and you can tell they care about you and that you will never be a number to any of them. I can't recommend them all enough."

Another satisfied party, T. Harrington wrote the following in their review: "Always personal

The Doctor Will See You Now

Telemedicine
Concerned about getting out and about? Make an appointment to visit from the convenience of calling in from home.

Curbside

Walk In

service and follow up care. Dr. Durians is a rare exception in a world of medical care that can feel like an assembly line approach focuses on numbers and not names. The staff reflects the philosophy of their leader. They all show compassion without losing sight of what is best long term for their patients. Highly recommended with 5 stars!"

Zeide R. wrote, "As new to Utah and as a family (relocated from Puerto Rico), we needed a health provider. I made a few calls to different medical offices and the MPFP was extremely welcoming and understanding of what we were looking for. We set an appointment for a routine check up, and everyone made us feel as if they knew us for a very long time. It was just perfect. Cold weather came and so the flu and everyone in the office took good care of us. I highly (HIGHLY) recommend them."
