Trending Benzene-Petrochemicals Market Trend

Many companies in the benzene market are focusing on research and developmental activities to discover new technologies and processes for the production of benzene. The technologies developed are expected to help curb environmental issues. For instance, in January 2021, Covestro, a German materials company received its first delivery of 2,000 metric tons of sustainable benzene from Total, a France-based petroleum company. The delivery enables Covestro to contribute to the circular economy. In addition, in May 2020, BioBTX, a Netherlands-based circular chemistry technology developer announced its plan to build the world's first

commercial production facility for sustainable aromatics such as benzene. The increase in such technological advances to reduce emissions will gain traction and contribute to the growth of the market.
