

# Apple Juice Market Size to Boost USD \$22.4 billion By 2027 | CAGR 5.3%- IndustryARC

*High Consumer Demand for Packaged Juices Owing to Hectic Lifestyle is Driving the Apple Juice Market.*

HYDERABAD, TELANGANA, INDIA, January 20, 2023 /EINPresswire.com/ -- IndustryARC, in its latest report, predicts that [Apple Juice Market](#) Size is estimated to reach \$22.4 billion by 2027. Furthermore, it is poised to grow at a CAGR of 5.3% over the forecast period of 2022-2027. Apple juice is made by macerating and pressing an

apple and has a variety of health benefits. During the manufacturing process, apple juice can be processed with enzymatic and centrifugal clarifying to remove pectin and starch. Polyphenols and main organic acids were determined in apple juices. Apples are one of the most frequently produced tree fruits and the third most traded fruit in the world, behind bananas and grapes. Apples are popular not only for their deliciousness but also for the key elements they offer such as rich antioxidants, vitamins and dietary fiber. Dehydration procedures are used to concentrate the juice. People nowadays drink fewer, higher-quality juices and are willing to spend more for the health benefits they associate with them. As a result, the category of juices in alcoholic beverages and food additives has increased in favor among customers all around the world. Apple juice is one of the most popular juices in the world since it is regarded as a healthy beverage that can help with digestion and heart health.
