#### About Biokript

Biokript is the world's first hybrid Shariah-compliant crypto exchange. This exchange aims to bring about a change to the crypto industry by implementing features from both centralized and decentralized exchanges to produce an efficient, well balanced ecosystem. With the Biokript Token (BKRP), users can trade with discounted fees and reap a 50/50 split of trade revenues through Biokript's mudarabah (profit-sharing) principle. Because it is a Shariah-compliant exchange, Biokript does not offer interest or APY on its platform. This model is adopted to allow Muslims to trade with confidence.
