DOUGLAS, ISLE OF MAN, January 23, 2023 /EINPresswire.com/ -- [Mineral Sunscreen Market](#) Value and CAGR

The global mineral sunscreen market is expected to grow from USD 7.19 billion in 2019 to USD X.XX billion by 2030, at a CAGR of 4.5% during the forecast period (2019-2030). Sunscreen is a topical medication that blocks the sun's harmful ultraviolet radiation. It is important to use sunscreen because the sun's rays can lead to skin cancer, wrinkles, and other skin problems. Sunscreen also helps protect the earth from further damage caused by the sun.

The factors driving the growth of this market include increasing awareness about the benefits of sunscreen, followed by mounting concerns over skin cancer. Some of the major drivers of this growth include technological innovations such as vegan and gluten-free variants, increasing consumer preference for natural ingredients, and expanding product offerings into new geographies.

Mineral Sunscreen Market Growth Drivers and Risks

Increasing awareness about the risks of skin cancer, As people become more aware of the dangers of UV radiation, they are more likely to use sunscreens to protect themselves. Growing

demand for natural and organic products, Many consumers are seeking out natural and organic products, and mineral sunscreens are seen as a more natural alternative to chemical sunscreens. Rising concerns about the safety of chemical sunscreens: Some studies have raised concerns about the safety of certain chemical sunscreen ingredients, leading to increased demand for mineral sunscreens.

Some of the risks and challenges faced by the mineral sunscreen market include:

- Competition from chemical sunscreens: Chemical sunscreens are often cheaper and easier to formulate than mineral sunscreens, which can make them more attractive to manufacturers and consumers.
- Limited availability in certain markets: Mineral sunscreens may not be as widely available as chemical sunscreens in some regions, which can limit their growth potential.
- Consumer misconceptions about effectiveness: Some consumers may mistakenly believe that mineral sunscreens are not as effective as chemical sunscreens, which can limit demand for these products.
