DOUGLAS, ISLE OF MAN, January 23, 2023 /EINPresswire.com/ -- [Organic Food Market](#) Value and CAGR

The size of the global organic food market was valued at USD 177 billion in 2020 and is projected to reach USD 498 billion by 2029, expanding at a compound annual growth rate (CAGR) of 12% from 2020 to 2029.

The production of organic food minimizes the use of synthetic chemicals, pesticides, and fertilizers and promotes the conservation of soil and water. To maintain and improve the health and productivity of their crops and animals, organic farmers rely on natural methods. Utilizing natural fertilizers such as compost and cover crops, crop rotation, and biological pest control may fall under this category.

Organic Food Market Growth Drivers and Risks

There are also a number of market drivers and restraints in the Asia-Pacific organic food market. Increasing demand for organic products, growing awareness of the environmental and health benefits of organic food, and favorable government policies and incentives are all factors driving the organic food market. Constraints include difficulties expanding production, competition from conventional food products, and the high price of organic products.
