ISLE OF MAN, January 23, 2023
/EINPresswire.com/ -- [Open Source Services Market](#) Value and CAGR

At a compound annual growth rate (CAGR) of 15.5%, the OSS market size is projected to increase from an estimated \$24.3 billion in 2021 to \$53.2billion in 2026.

Open source services refer to the creation and delivery of services using open source software and open source development techniques. Open-source software is software whose source code is publicly accessible, allowing anyone to view, modify, and distribute it. Open source software development is a collaborative approach to software development in which programmers from all over the world contribute to and enhance the software.

Open Source Services Market Growth Drivers and Risks

The adoption of open source services is motivated by the potential for lower costs, the ability to customise and modify software to meet specific requirements, and the ability to collaborate with a global community of developers.

Concerns about security, the need for specialised skills and knowledge to manage and maintain the software, and potential legal issues related to the use of open source licences are impediments to the adoption of open source services.
