Some Key Highlights from the Report

Based on the type, the validation segment is expected to register a CAGR of 10.6% over the forecast period due to extensive use of this product form in the pharmaceuticals industry, as these aid in detecting drug therapy failure by recognizing non-responders with distinct genetic profiles and weak therapeutic profiles.

The cardiovascular disease segment is expected to register a CAGR of 10.4% during the forecasted period due to rising focus on discovering cardiac biomarkers to achieve a better understanding of the pathophysiology of these diseases.

Drug discovery and development segment accounted for a significantly large revenue share in the global clinical biomarkers market in 2019. This segment also accounted for majority share of 38.2% among the other application segments in the North America market in 2019.

## Regional Insights:

North America accounted for largest revenue share in the clinical biomarkers market in 2019

In 2019 North America accounted for robust double-digit revenue share of 39.9%, driven by rising prevalence of chronic diseases and illnesses and ambitious policy initiatives. Local involvement of regulatory authorities as well as key players in the industry is expected to result in further exploration and production of biomarker-based drugs in the coming years.

Asia Pacific market revenue is expected to expand at a rapid CAGR due to factors such as involvement of global and leading biomarker companies, competitive strategies for drug co-development, and increasing spending in R&D in developing countries in the region.

## Segments Covered in Report

For the purpose of this report, Emergen Research has segmented the global clinical biomarkers market on the basis of type, disease, application, and region:
