Vitamin B12, also known as cobalamin, is a water-soluble vitamin that plays an important role in metabolism. One of the eight B vitamins. Animals require it as a cofactor in DNA synthesis, as well as in fatty acid and amino acid metabolism. The rising prevalence of vitamin B12 deficiency is expected to skyrocket during the forecast period. According to a March 2019 article published in the Indian Journal of Endocrinology and Metabolism, the prevalence of vitamin B12 deficiency in the north Indian population is 47%. Diabetes patients have higher vitamin B12 levels than the general population, but deficiency remains common.
