

# Dymax to Exhibit at the MD&M West 2023 Trade Show

*Cutting Edge Light-Cure Products will be Presented, Including a Sneak Peek at a Revolutionary New Technology*

TORRINGTON, CT, UNITED STATES, January 24, 2023 /EINPresswire.com/ -- Dymax Corporation, a leading manufacturer of rapid and light-curing materials and equipment, will exhibit at MD&M West booth 1929, from February 7-9, 2023, at the Anaheim Convention Center in Anaheim, CA.

Light-Curing Technology for Medical Device Assembly

For medical device design engineers, the first-of-kind 2000-MW series of [medical wearable adhesives](#) formulated without materials of concern for safer use when in proximity to the skin will be featured. These products are compatible with common and difficult-to-bond-to substrates and passed ISO 10993-10 / -23 for sensitization and irritation and ISO 10993-5 cytotoxicity. MD® 1045-M, a new adhesive for the assembly of pre-fillable syringes and injection devices, will also be introduced. The product features excellent bond strength after sterilization and cleaning, with very low extractables.

Of particular interest to manufacturers that need materials that cure in both light and darkness, a ground-breaking technology that meets these requirements will be revealed.

Dymax specialists will be on hand to discuss and demonstrate products unique to the company, including 1040-M adhesive and coating for durable protection during multiple autoclave cycles, 1172-M-UR moisture-resistant adhesive for in vitro diagnostic device assembly, and the 215-CTH series of [catheter bonding adhesives](#) engineered for reliability.

Also featured in the booth will be a selection of the company's latest broad-spectrum and LED curing equipment, including the improved BlueWave® 200 V4.0 and QX4 V2.0 spot-curing lamps and the redesigned, enhanced UVCS V3.0 light-curing conveyor. For visitors interested in fully integrated curing solutions, the Dymax Tube Bonder, which incorporates a BlueWave® MX-150 flood-curing lamp with the new AccuTrack™ sensor and an inspection system, will be on display.

Stop by to discuss your applications with technical experts and to see in-booth demonstrations of key products and technologies. Follow Dymax on LinkedIn to find out how to receive a FREE hall admission or visit their MD&M West trade show page for a preview of the products that will be presented.

#### About Dymax

Dymax develops innovative rapid and light-curable materials, dispense equipment, and [UV/LED light-curing systems](#). The company's adhesives, coatings, and equipment are perfectly matched to work seamlessly with each other, providing design engineers with tools to dramatically improve manufacturing efficiencies. Major markets include aerospace and defense; medical devices; and consumer and automotive electronics.
