## [Lawn and Garden Consumables Market](#): Overview

The lawn is the area that is covered by soil, durable plants, shrubs, grasses, and others that are sustained with short height with a lawn mower. Whereas gardens are well-organized areas where turf grasses, ornamental crops, flowering plants, and decorative plants are grown to maintain a healthy and aesthetic environment.

In addition, lawn spaces are used as play areas for kids, outdoor activities, and relaxation purposes, whereas gardens environ home that adds an aesthetic look to its

surrounding. Increasing trends in urban green spaces and parks are predicted to offer new opportunities to the market.

## Lawn and Garden Consumables Market: Growth Drivers

Gardening has become one of the vital parts of urban infrastructure. To make gardening more efficient and sustainable, the demand for organic fertilizers such as animal manure, worm compost, crop residue, food waste, sewage sludge, and peat moss has increased. This is anticipated to increase the growth of the lawn & garden consumable market during the forecast period.

In response to this, there are several leading key manufacturer actively engaged in developing advanced lawn & garden consumables machines that offer ease of operation, enhances convenience, and helps in increasing the efficiency of gardening activity. The launch of natural product variants, machinery, and organic gardening practices will propel the market growth during the forecast period.
