The presence of these companies has enabled India to become one of the largest producers and exporters of automobiles in the world, thereby creating immense opportunities for Indian automotive plastic vendors to capitalize on this growth as well as expand their business operations across various regions in India where there is an untapped potential for growth for automotive plastics solutions providers.

Various government initiatives such as Make in India, Skill India and Digital India have provided great impetus to the development of the Indian automobile industry which has seen remarkable expansion over the last few years resulting in increased demand for various components including plastics used by OEMs and Tier 1 suppliers that are supplied by leading Indian auto component suppliers such as Motherson Sumi Systems Limited (MSSL), Subros Limited (SRL), Sundaram Clayton Limited (SCL), Rane Group (RGL) etc.. Moreover, growing foreign direct investment into India's auto component sector has further added to increased demand for plastic components within the country.
