

Spirit Electronics Expands its Distribution Portfolio with Intelligent Memory

Intelligent Memory offers many legacy and obsoleted memory products that industrial customers are looking for, sparing them from costly re-designs

IRVINE, CALIFORNIA, UNITED STATES, January 24, 2023 /EINPresswire.com/ -- Intelligent Memory (IM), a manufacturer of industrial-grade memory product solutions, has signed Spirit Electronics as its distribution partner expanding its memory portfolio to industrial avionics and aerospace industries in the United States.

Intelligent Memory focuses on legacy memory products for industrial applications. It is one of the few memory manufacturers that offers DRAM components as well as DRAM modules ranging from SDRAM to DDR4 in addition to its customizable NAND flash memory portfolio. All memory products are available in a wide range of capacities and configurations, making IM's portfolio one of the most comprehensive offerings in the market from one single source.

Spirit Electronics now carries specialty memory products from Intelligent Memory

UNLIMITED INGENUITY

Intelligent Memory offers many legacy and obsoleted memory products

“Our memory portfolio is designed with the requirements of industrial applications on quality, longevity and long-term availability in mind,” explained David Raquet, Global Sales Leader at Intelligent Memory. “With its in-house electrical testing, screening, and radiation hardening capabilities, Spirit Electronics adds additional value for its customers and extends our reach to industries with the most stringent requirements.”

Our memory portfolio is designed with the requirements of industrial applications on quality, longevity and long-term availability in mind.”

David Raquet, Global Sales Leader at Intelligent Memory

Marti McCurdy, Spirit Electronics CEO, added, “IM has many solutions for legacy and obsoleted memory products, often allowing engineers to avoid a re-spin of the circuit board. Many of their products are backward compatible with those of other memory manufacturers.”

Spirit Electronics is focused on helping aerospace, defense, automotive, medical and other industrial customers gain a competitive advantage through strategic sourcing and logistics management.

About Intelligent Memory:

Intelligent Memory has been developing memory products for demanding industrial applications since 1991 (as Pacific Force Technology Limited until 2013). The extensive product portfolio consists of DRAM ICs and modules (from SDR to DDR4) and a variety of managed NAND products and has been designed to meet the industry’s demands for quality, reliability, longevity and long-term availability. About Spirit Electronics

Spirit Electronics is a value-added distributor of a wide range of electronic components, testing, circuit board assembly and logistics services. Spirit’s supply chain solutions are changing the definition of distribution by providing in-house value-added services to deliver products to aerospace, defense, electronic vehicle, medical and industrial customers fully qualified and ready to use. Spirit is a veteran-owned, woman-owned small business (VOWOSB) with HUBZone certification in Phoenix, AZ. For more information, visit <https://www.spiritelectronics.com>.
