

The Colonoscopy Industry: Understanding the Market and Its Potential, High Demand Report Forecast 2030

Colonoscopy Market Size – USD 30.57 Billion in 2021, Market Growth – at a CAGR of 5.4%, Market Trends – Evolution in the techniques to diagnose cancer

VANCOUVER, BRITISH COLUMBIA, CANADA, January 24, 2023 /EINPresswire.com/ -- The global [colonoscopy market](#) size reached USD 30.57 Billion in 2021 and is expected to register a revenue CAGR of 5.4% during the forecast period, according to latest analysis by Emergen Research. Increase in the prevalence of colorectal cancer and increasing popularity of minimally invasive techniques are primary factors driving the revenue growth of the colonoscopy market. A colonoscopy is a minimally invasive screening that finds early cancer indications to stop it from spreading. A tiny camera is inserted into the rectum during a colonoscopy in order to view the interior of the large intestine. It can be tempting to put off arranging the screening as most people experience anxiety at the notion of having a colonoscopy. However, the surgery is rather quick and painless, and it can even save lives.

A recent development in the market involves using artificial intelligence (AI) to detect polyps during colonoscopies. For instance, HCA Florida Largo Hospital is taking part in a new trial to detect colon cancer earlier. In the study, artificial intelligence is mostly used to locate polyps during a colonoscopy. The CAD EYE technology is a FujiFilm invention. Patients won't be able to tell the difference because doctors use the same scope throughout every colonoscopy. The device is designed to find millions of polyps.

The section on the competitive landscape offers valuable and actionable insights related to the business sphere of the Colonoscopy market, covering extensive profiling of the key market players. The report offers information about market share, product portfolio, pricing analysis, and strategic alliances such as mergers and acquisitions, joint ventures, collaborations, partnerships, product launches and brand promotions, among others. The report also discusses the initiatives taken by the key companies to combat the impact of the COVID-19 pandemic.

Key Companies Profiled in the Report are:

Olympus Corporation, Stryker, ESS Medical, Absolute Medical, Medical Recovery Company, Inc., PENTAX Medical, Pro Scope Systems, Endo Technologies, MedWrench, LLC., FUJIFILM Holdings Corporation

How will this Report Benefit you?

An Emergen Research report of 250 pages features 194 tables, 189 charts, and graphics. Our new study is ideal for anyone who wants to learn about the global Colonoscopy market commercially and deeply, as well as to analyze the market segments in depth. With the help of our recent study, you can analyze the entire regional and global market for Colonoscopy. To increase market share, you must obtain financial analysis of the entire market and its segments. Our research suggests there are significant opportunities in this rapidly expanding market for energy storage technology. Look at how you might take advantage of these revenue-generating opportunities. Additionally, the research will help you develop growth strategies, strengthen competitor analysis, and improve business productivity by enabling you to make better strategic decisions.

Some Key Highlights From the Report

The colonoscope visualization systems segment accounted for the largest revenue share in 2021. During a colonoscopy, a lengthy, flexible tube known as a colonoscope is inserted into the rectum. A tiny video camera at the tip of the tube allows the doctor to see the whole interior of the colon. Through the scope, polyps or other types of abnormal tissue can be removed during a colonoscopy. Tissue samples (biopsies) can also be obtained during a colonoscopy. Investigating intestinal signs and symptoms is one used for colonoscope visualization equipment. With the use of these systems, a doctor can look into the potential causes of digestive problems such as stomach pain, rectal bleeding, recurrent diarrhea, and others. They are also employed for colon cancer screening.

The polyps or colorectal cancer segment accounted for the largest revenue share in 2021. A colon polyp is a small cell cluster that forms on the lining of the colon. Most of the time, colon polyps are harmless. However, some colon polyps can develop into colon cancer over time, which can be fatal if caught in an advanced stage. Regular screening tests, such as colonoscopies, are essential since colon polyps are typically completely and safely removed when found in the early stages. The best way to prevent colon cancer is to regularly find and remove polyps. Colorectal cancer, often known as bowel cancer or colon cancer, is the third most prevalent cancer in the world. It comes up at number two among female cancers and number three among male cancers. About 1.9 million brand-new cases of colorectal cancer will be diagnosed in 2020.

The ambulatory surgery centers segment accounted for the largest revenue share in 2021. Revenue growth for this market segment is expected to be driven by an increase in colonoscopy procedures. In only the United States alone, more than 15 million colonoscopies are performed annually. Instead of hospitals, ambulatory surgery centers do the majority of colonoscopies. They provide the same level of safety for surgery as hospitals, according to a study. An overnight stay is not necessary for procedures performed in ambulatory surgical facilities. They are not connected to any hospitals. Ambulatory surgery centers are small locations where patients can receive straightforward, minimally invasive surgical and diagnostic procedures. Surgery can seem obtrusive and terrifying, however, many of the treatments can be done in a standalone facility and are just minimally invasive.

North America accounted for the largest revenue share in 2021 attributed to the increasing prevalence of colorectal cancer in countries in this region. For instance, colorectal cancer is the third most common cancer in both men and women in the United States. 10.5% of new cases of colorectal cancer are believed to be diagnosed in those under 50, despite the fact that it is normally diagnosed in people over 50. The incidence of colorectal cancer has increased by about 15% in adults between the ages of 40 and 49 during the previous 20 years. Therefore, the rising incidence of colorectal cancer in the region's countries is expected to drive market revenue growth.

You need to discover how this will impact the Colonoscopy market today, and over the next 10 years:

Our 250-page report provides 194 tables and 189 charts/graphs exclusively to you.

The report highlights key lucrative areas in the industry so you can target them – Now.

It contains in-depth analysis of global, regional and national sales and growth.

It highlights for you the key successful trends, changes and revenue projections made by your competitors.

This report tells you Today how the Colonoscopy market will develop in the next 10 years, and in line with the variations in COVID-19 economic recession and bounce. This market is more critical now than at any point over the last 10 years.

Market Overview:

The report bifurcates the Colonoscopy market on the basis of different product types, applications, end-user industries, and key regions of the world where the market has already

established its presence. The report accurately offers insights into the supply-demand ratio and production and consumption volume of each segment.

Segments Covered in this report are:

Product Type Outlook (Revenue, USD Billion; 2019-2030)

Colonoscope Visualization Systems

Others

Application Outlook (Revenue, USD Billion; 2019-2030)

Colorectal Cancer Lynch Syndrome

Ulcerative Colitis

Crohn's Disease

Polyps or Colorectal Cancer

Others

End-Use Outlook (Revenue, USD Billion; 2019-2030)

Hospitals

Clinics

Ambulatory Surgery Centers

Others

Forecasts to 2030 and other analyses reveal commercial prospects

In addition to revenue forecasting to 2030, our new study provides you with recent results, growth rates, and market shares.

You will find original analyses, with business outlooks and developments.

Discover qualitative analyses (including market dynamics, drivers, opportunities, restraints and challenges), cost structure, impact of rising Colonoscopy prices and recent developments.

This report includes data analysis and invaluable insight into how COVID-19 will affect the industry and your company. Four COVID-19 recovery patterns and their impact, namely, “V”, “L”, “W” and “U” are discussed in this report.

How will the Colonoscopy Market, 2022 to 2030 report help you?

In summary, our 250-page report provides you with the following knowledge:

Revenue forecasts to 2030 for Colonoscopy Market, 2022 to 2030 Market, with forecasts for include report segmentation and company size, each forecast at a global and regional level – discover the industry’s prospects, finding the most lucrative places for investments and revenues.

Revenue forecasts to 2030 for four regional and 20 key national markets – See forecasts for the Colonoscopy Market, 2022 to 2030 market in North America, Europe, Asia-Pacific and LAMEA. Also forecasted is the market in the US, Canada, Mexico, Brazil, Germany, France, UK, Italy, China, India, Japan, and Australia among other prominent economies.

Prospects for established firms and those seeking to enter the market – including company profiles for 15 of the major companies involved in the Colonoscopy Market, 2022 to 2030.

Find quantitative and qualitative analyses with independent predictions. Receive information that only our report contains, staying informed with invaluable business intelligence.

Information found nowhere else

With our new report, you are less likely to fall behind in knowledge or miss out on opportunities. See how our work could benefit your research, analyses, and decisions. Emergen Research study is for everybody needing commercial analyses for the Colonoscopy Market, 2022 to 2030, market-leading companies. You will find data, trends and predictions.

The content of each profile differs, depending on the organization. In general, a profile gives the following information:

Overview of the company’s Colonoscopy products & services

Analysis of recent financial performance–annual revenue of the companies

Assessment of developments–activities, acquisitions, production capacity, deals, new service offerings and collaborations

Key Benefits For Stakeholders:

The report provides an extensive analysis of the current and future trends in the global minimally invasive surgical systems market to elucidate the imminent investment pockets.

A detailed analysis of the factors that drive and restrict the growth of the minimally invasive surgical systems market is provided.

Extensive analysis of key segments demonstrates the types of energy devices, access equipment, and visualization & documentation systems used in minimally invasive surgeries.

A comprehensive analysis of the geographical landscape provides detailed information about various regions across North America, Europe, Asia Pacific, Latin America, and Middle East & Africa.

The report offers a competitive landscape of the minimally invasive surgical systems market to assist players to gain insights into the competition scenario. Key companies operating in the market are profiled to provide valuable insights.

About Us:

Emergen Research is a market research and consulting company that provides syndicated research reports, customized research reports, and consulting services. Our solutions purely focus on your purpose to locate, target, and analyse consumer behavior shifts across demographics, across industries, and help clients make smarter business decisions. We offer market intelligence studies ensuring relevant and fact-based research across multiple industries, including Healthcare, Touch Points, Chemicals, Types, and Energy. We consistently update our research offerings to ensure our clients are aware of the latest trends existent in the market. Emergen Research has a strong base of experienced analysts from varied areas of expertise. Our industry experience and ability to develop a concrete solution to any research problems provides our clients with the ability to secure an edge over their respective competitors.
