

Global PE Fund Seeks Producing Upstream Oil Investments Worldwide

More than \$1 billion is available for immediate placement, closing is possible within 60 days

HOUSTON, TEXAS, UNITED STATES, January 26, 2023 /EINPresswire.com/ -- MHM is working with a global PE fund that is seeking to place substantial capital worldwide in upstream crude oil and liquids assets. All non sanctioned countries are welcome. The fund has more than \$1 billion available for immediate placement. The investor requires minimum 5000 barrels per day existing production of crude oil or liquids. They absolutely require current production of crude or liquids and will not invest in exploration unless there is at least 5000 bpd current production. They seek a non operating minority or majority equity stake and can bring blue chip coinvestors. Fund prefers to deal directly with sellers but will consider credentialed verified advisors who are direct to sellers.
