

Humidifier Market To Reach USD 4.2 million by 2026 | North America Offers Lucrative Opportunities

The significant usage of humidifiers for sleep apnea applications will in particular drive the market growth.

HYDERABAD, TELANGANA, INDIA, January 25, 2023 /EINPresswire.com/ --

IndustryARC, in its latest report, predicts that [Humidifier Market](#) is estimated to reach \$4.2 million by 2026, witnessing a CAGR 20.53% from 2021 to 2026. Humidifiers are devices that emit water vapour or steam into the room to increase the moisture levels in the air humidity. Humidity levels in the air depend on the season like in the summer humidity levels will be higher and during winter they tend to be low. Ideally the humidity levels in the air should be between 30% and 50% below or above this level can cause problems like in low humidity Dry Skin and Itchy Eyes and in high humidity Respiratory problems and develop allergies.

Key Takeaways:

This IndustryARC report on the Humidifier Market highlights the following areas –

- Humidifier sales across the globe are increasing rapidly due to rising pollution levels and impact the quality of air outside which leads to adoption of humidifiers.
- In 2019, the revenue generated through humidifier sales across globe was \$3.0 billion and is estimated to grow more in forecast period.
- Humidifier therapy adds moisture to the air to prevent dryness problems which causes

irritation to many parts of the body. Humidifiers ease some symptoms like flu and common cold.

- Usually, the humidity in the air should be 30% to 50% and humidifiers emits vapors or steam in order to keep the humidity in medium level.

Segmental Analysis:

By Humidifier Type:

There are different types of humidifiers are available and it should be used depending on the climatic conditions and there are cool-mist humidifiers and warm-mist humidifiers. Warm-mist humidifiers allow the moisture to reach highest level and they also kill the bacteria with steam. Cool-mist humidifiers on the other hand use air filters to remove impurities.

By Installation Type:

Humidifier installation is done in two ways fixed and portable. Fixed humidifiers work with a building heating and cooling systems to add needed moisture to the air as it circulates. This segment is set to dominate the market with a share of 66.9% in 2020. They are installed between the supplies and return air ducts and works with HVAC system.

By Geography:

Asia-Pacific air humidifier market is set to dominate the market in the forecast period reaching 36.2% by 2026. India, China and Japan are the countries which led to deployments of humidifiers across these regions due to rapidly growing pollution levels in this countries and deteriorating air quality both indoors and outdoors.
