- SH Inc
- StepStone GmbH

Integration of Artificial Intelligence (AI) in recruitment; Several businesses use artificial intelligence in the HR, some way or another. AI is expected to be used in the recruiting process by businesses. AI for hiring refers to the use of artificial intelligence to solve problems in the

same way that a machine does. The use of technology is assisting in the streamlining of high-volume activities in the recruitment process. Online application management is one of the ways AI is assisting businesses with the recruiting process. Applicant monitoring from recruiter databases involves many keywords and other data points that AI can easily filter and analyze. To speed up the hiring process, AI assists recruiters in sorting through thousands of resumes. This is bolstering the growth of the online recruitment market.
