

# The Growing Demand for Automatic Gate Opening Systems in Commercial and Residential Properties Forecast to 2032

Market Study on Automatic Gate Opening Systems: Military End Use to Remain Key for Market Players

NEW YORK, NEW YORK, UNITED STATES, January 26, 2023 /EINPresswire.com/ -- 00000000 0000 0000

The global <u>Automatic Gate Opening</u>

<u>System Market</u> is currently valued at

US\$ 3.07 Bn (2022). 000000 000000 00

000 0000000 00 00000 00\$ 0.00 00

Worldwide sales of automatic gate opening systems are expected to reach US\$ 6.34 Bn by the end of 2032.

IoT- and AI-based technology being combined with automated gates is a key trend in this space. East Asia is a lucrative market for automatic gate opening system manufacturers, and is anticipated to hold the largest market share of 25.6%. The market in Germany is anticipated to expand at 5.8% CAGR by value through 2032.

The Automatic Gate Opening System market has seen significant growth in recent years, driven by advancements in technology and an increasing demand for security and convenience. These systems are used in a variety of settings, including residential properties, commercial buildings, and industrial sites.

One major factor driving the market is the increasing adoption of smart home technology. Automatic gate opening systems can be integrated with other smart home devices, such as

security cameras and smart locks, to provide a more comprehensive security solution. Additionally, these systems can be controlled remotely through a smartphone app, allowing for greater convenience and flexibility.

Another driver of the market is the growing need for security and surveillance. Automatic gate opening systems can be integrated with security cameras and other surveillance technology, providing an added layer of protection for properties. Furthermore, these systems can be configured to only allow authorized individuals access, further enhancing security.

## 

- Increasing application of automatic barriers across transportation hubs and residential areas to enhance security and safety around these areas is estimated to fuel growth of the automatic barriers market.
- Each automatic gate opening system requires motors and an access control system for operations, in which there is more than one access control system implemented for one motor.
- Military and industries are major end users of automatic gate opening systems due to the requirement of high security and restrictions at such places.
- Automatic bollards are primarily used across high-security areas such as airports, defence sites, industries, hotels, and government buildings, among others. Bollards are now available with lights or glowing tapes at the top to avoid accidents and other related issues.
- Military and industries are major end users of automatic gate opening systems due to the requirement of high security and restrictions at such places. The military segment is anticipated to remain key and account for more than 24% market share by value in 2022.

"Upsurge in arrogation of security and regulated access in restricted areas such as military, industries, residential, etc., using different types of gates to restrict unwanted persons, and increasing technological advancements for security reasons, are driving market expansion" says a Persistence Market Research analyst.
