

# AV-Comparatives Prolongs ISO 9001:2015 Certification for Independent Testing of Anti-Virus Software

*This certification is crucial for ensuring that users have the necessary information to make informed decisions about their IT security products.*

INNSBRUCK, TYROL, ÖSTERREICH, January 26, 2023 /EINPresswire.com/ -- [AV-Comparatives](#), a leading provider of independent testing for anti-virus software, is proud to announce the prolongation of its [ISO 9001](#):2015 certification. The certification, which is recognized globally as a benchmark for quality management systems, confirms AV-Comparatives' commitment to delivering the highest quality tests and evaluations of anti-virus software.

The scope of AV-Comparatives' ISO 9001:2015 certification is "Independent Test of Anti-Virus Software." This certification is crucial for ensuring that users, CIOs, and enterprises have the necessary information to make informed decisions about their IT security products.

“

This ISO certification is a testament to the hard work and dedication of our team, and it confirms our commitment to providing users with the most accurate and reliable information .”

*Peter Stelzhammer, co-founder AV-Comparatives*

AV-Comparatives is known for its rigorous and thorough testing methods, which are designed to provide users with an accurate and unbiased assessment of the effectiveness and performance of anti-virus software. The organization's team of experts conduct extensive evaluations of anti-virus software from leading vendors, using a combination of real-world scenarios and simulated attacks to test the software's ability to detect and prevent malware.

"We are thrilled to have prolonged our ISO 9001:2015 certification," said Peter Stelzhammer, co-founder and ISO officer of AV-Comparatives. "This certification is a testament to the hard work and dedication of our team, and it confirms our commitment to providing users with the most accurate and reliable information about IT-security software."

AV-Comparatives is dedicated to helping users, CIOs, and enterprises make informed decisions about their IT security products. The organization's independent tests and evaluations are widely recognized as the most comprehensive and reliable in the industry and are relied upon by IT professionals and organizations around the world.
