

Mobile Laser Cleaning Franchise Starts New Year with Powerful Discovery Day Event

The informative franchise event hosted interested potential franchisees from across the US and demonstrated Advanced Laser Restoration's technology in person.

WILMINGTON, NORTH CAROLINA, UNITED STATES, January 27, 2023 /EINPresswire.com/ -- [Advanced Laser Restoration](#), a mobile laser cleaning service that launched its national [franchise opportunity](#) in 2022, kicked off 2023 with a powerful Discovery Day event. The January event was held at the company's headquarters in North Carolina. Individuals from across the US interested in the Advanced Laser Restoration's franchise opportunity were in attendance along with Greg Price, the Director of Sales.

Greg Price and the Advanced Laser Team speak to a full room at the company's first Discovery Day Event of 2023.

“The day was a success. We had several potential franchisees from a variety of industries come from all over the nation to learn more information about our franchise,” stated Price. “They all saw the value of the product and business model and wanted to be first in line to join us.”

“

This event allowed them to see our technology demonstrated right in front of their eyes. It's a game changer for the industry and for those seeking an investment they can trust.”

Greg Price, Director of Sales

Advanced Laser Restoration first launched its franchise sales initiative in the fall of 2022, culminating into the Discovery Day event.

“We received a lot of thank you letters from people, which was so nice,” said Price. “This event allowed them to see

our technology demonstrated right in front of their eyes. It's a game changer for the industry

and for those seeking an investment they can trust.”

The future is more than promising for the company. The January event alone was successful, with many working to secure their own territory. Already the company is seeing its franchise territory goals for the year come together, says Price. Advanced Laser Restoration aims to have locations across the US and Canada, as well as in Australia.

“Our focus is, number one, on technology as a company. If you have the best technology and you have the best process, you give the people you are working with the best chance for success,” Price stated in a video shot the day of the event.

Advanced Laser Restoration will continue to hold Discovery Day events throughout the year where interested individuals can have a first-hand look at the market disrupting technology, ask questions, and hear directly from the ALR team in person.

One attendee had this to say: “It’s an awesome package...great opportunity for starting a business for a very small amount of money relative to what you’re getting.” The franchise package includes on-demand support, comprehensive training, marketing guidance, and more.
