

Organic Soy Lecithin Market to Reach US\$78.7 million by 2027: IndustryARC

The growing usage of soy lecithin in the food industry is estimated to drive the market growth of the Organic Soy Lecithin Market.

HYDERABAD, TELANGANA, INDIA, January 27, 2023 /EINPresswire.com/ -- IndustryARC, in its latest report, predicts that [Organic Soy Lecithin Market](#) Size is estimated to reach \$78.7 million by 2027. Furthermore, it is poised to grow at a CAGR of 6.4% over the forecast period of 2022-2027.

Organic Soy Lecithin is a naturally occurring yellowish-brown fatty compound found in plants. It has the capacity to boost emulsion stability and improve the creamy texture of food items. In addition, it delivers nutritional advantages to the human body by boosting protection against illnesses such as arthritis, asthma, and Alzheimer's disease. Many firms supply organic soy lecithin on the market to suit the rising demand for food additives among customers worldwide. Soy lecithin does not contain significant levels of isoflavones. Soy-derived lecithin has long been used as a food additive. Lecithin and phospholipids are used as an emulsifier, lubricant, stabilizer, wetting, and thickening agent in a broad range of culinary items, including sauces, chocolates, and dressings. Soy lecithin is also high in choline, a vitamin-like key component that lowers harmful cholesterol levels, making it a popular dietary supplement among heart-healthy people. Rising demand for lecithin owing to health benefits is driving the market. Also, side effects owing to genetically modified soybeans are poses a threat to the market.
