

Ceramine Offers an Extensive Variety of Reliable and Healthy Skin Care Products

CHICAGO, IL, UNITED STATES, January 27, 2023 /EINPresswire.com/ -- The K-Beauty company was started by a Korean mother, striving to provide safe and chemical-free skin care products for her family.

Have you ever heard of a highly renowned skin care company being established by a judge's wife? [Ceramine](#), a South Korean skincare company is committed to manufacturing healthy and top-notch K-beauty products, offered at affordable rates.

Since choosing products from a company with a reputable line of products can be helpful, and each component may be designed to work in conjunction with the others, the company has established solid credibility, resulting in becoming one of the leading brands in the beauty industry for allowing busy modern people to utilize skin care products at home to attain the same results as getting a skincare from a dermatologist. Furthermore, all Ceramine products are safe and appropriate for pregnant women. The company takes pride in offering a wide product range, along with launching [Pure Collagen Mask Pack](#) and [Aqua Face Mask Pack](#), made with natural and reliable ingredients.

The products include active ingredients extracted from freeze-dried and embedded onto a thin matrix mesh that holds the precious anti-aging potion together. As a result of this new technology, 100% of the collagen is fully absorbed into the skin, ensuring no waste as compared to regular essence sheets. Through the newly launched product, the company ensures to assist customers with anti-aging, skin-lifting skin regeneration, skin-soothing, and skin texture improvement.

"Ceramine was motivated by a desire to pursue safe and balanced "health" and "beauty" while fundamentally healing skin conditions that occur as a result of imbalanced lifestyles and unhealthy environments. We love our customers and we provide them with high-quality and best products from top brands. We offer easy and convenient shipping worldwide. The products are made with patent-specialized skin lifting and Ceramide, a patent raw material that is higher in technology than other skincare brands. As a result, it helps replenish, moisturize and revitalize the skin's outer layers. They help your skin look younger and suppler while minimizing the appearance of fine lines and wrinkles," says the founder of Ceramine.

Founded by the judge's wife who desired chemical-free and natural skin care products for her husband and children, Ceramine stands out among its competitors for developing products by extracting highly enriched enzymes from plants with natural mineral catalysts in a bacteria-free environment. The company ensures to maintain the balance between nature and science by extracting the crystals of pure plants with cutting-edge techniques to create safe, reliable, and highly-effective skin care products. Using groundbreaking and patent technology, the company ensures to extract mineral catalysts naturally, rather than using artificial extraction methods, ensuring it provides the greatest skin regeneration effect.

In order to manufacture Chemical free and safe ingredients products, Ceramine guarantees to offer the products without containing phenoxyethanol, paraben, sodium lauryl sulfate, Cyclomethycaine, oxybenzone, triclosan, and several other pernicious compounds. In addition, to protect the customer's skin from any damage, the company ensures to add no artificial surfactants or synthesized pigments, or any other stimulating ingredient that might trigger an unwanted allergy.

The CEO adds, "Ceramine has patented Nano ceramide technology with great ingredients so ceramine products are specialized in skin recovery within a short period of time. It is developed to efficiently promote both collagen regeneration as well as cell growth for improving fine lines and wrinkles. You can also be more assured of the products' quality and may better be able to predict how your skin will react to trying a different product in the same line."

The rising demand for Ceramine's product has enabled the company to launch several offline stores and duty-free shops, drug stores, and department stores in Asia, including South Korea, Hongkong, Taiwan, Indonesia, Malaysia, and Singapore. The company aims to launch in Japan in 2023, catering to a large customer base in different regions.
