The wooden interior door market growth is attributed to the rising construction sector due to growing urbanization. China, the US, India, Japan, Canada, Indonesia, France, Germany, Australia, and Spain witnessed significant growth in the construction market due to the rise in house-building projects and favorable government policies. Further, using sustainable and certified forest trees for manufacturing wooden interior doors is anticipated to propel the wooden interior doors market in the coming years.

Based on customer's design space and budget, different types of interior doors are available in the wooden interior doors market. The adoption of the latest types of interior doors such as standard stile, barn doors, rail doors on hinges, and custom wood door topping is significantly high across the world. As compared to traditional door swings, barn doors offer additional functionality and save space; hence, the standard doors are being converted into barn doors. Thus, the rising construction of barn doors is projected to fuel the adoption of sliding doors, which is propelling the wooden interior doors market.

Although several manufacturers have showrooms to attract customers, a wider customer base can be easily approached through distributors and retailers. Hence most manufacturers have several regional distributors and retailers. Lowe and IKEA are prominent multi-chain retailers who aid wooden interior door manufacturers reach a wider audience. Depending on profitability and desired quality, a construction company may choose different door manufacturers for different projects. For a homeowner undertaking renovations, pricing, finish, color, and quality are key factors to consider. This has influenced the wooden interior door market players to innovate their product, offer several color options, and adopt competitive pricing strategies. This factor is further influencing the wooden interior door market growth.

Wooden Interior Door Market: COVID-19 Pandemic Impact

The onset of the COVID-19 crisis in 2020 led to a halt in infrastructure and construction activities worldwide. However, the pandemic led to a shift in people's preferences owing to the implementation of lockdown, which resulted in the temporary closure of manufacturing facilities of many products for interior doors. Furthermore, the pandemic stimulated the need to create a healthy environment, mainly in residential areas, forcing people to stay indoors. Also, there was an increase in upgrading personal living spaces either by undertaking renovation projects or purchasing new residential properties. Thus, the surging investment by consumers has created a notable demand for interior doors. Conversely, there has been an increased demand for construction and renovation activities focused on making structural changes to incorporate in office spaces, thereby boosting the wooden interior doors market expansion in the coming years.
