[Trending Motor Vehicle Body Market Trend](#)

The automotive industry uses various structural materials, including iron, steel, and other

metals. Recently, aluminium has been the most preferred metal in the automotive industry as a material of choice for next-gen and advanced vehicles. According to The Aluminum Association, aluminium is used predominately in the automotive industry due to its cost-effective and environment-friendly way to improve efficiency and performance, reduce emissions, and boost fuel efficiency while improving and maintaining durability and safety. For instance, Tata Technologies announced a collaboration with NIO China to develop NIO's range of electric vehicles. This partnership was aimed towards the production of the first electric all-aluminum vehicle by NIO. Tata Technologies, a Tata Group company, is engaged in providing services in engineering and design, manufacturing, management, and IT services to automotive original equipment manufacturers and their suppliers.
