

Transforming Kidney Care Through Equity Crowdfunding | Join Today

NEW YORK, USA, January 30, 2023 /EINPresswire.com/ -- HB Biotech announces [equity crowdfunding](#) to launch their new medical product that changes the paradigm of how fluid is managed by and eliminated from the body.

HB Biotech is commercializing [Fluid Lock System](#) — an ingestible kidney bypass device that diverts fluid that would normally be processed by the kidneys to the GI tract where it is absorbed, entrapped, and excreted using 3D superabsorbent technology.

“

Equity crowdfunding opens the door to a community-based approach toward investors and gives us the ability to grow a company that is for the people as well as by the people.”

(female) Founder/CEO of HB Biotech, Dani Berger

This clinically proven and globally patented medical product from [HB Biotechnologies Corporation](#) (a female founder run business) changes the dynamics of kidney care and provides an important new solution to help chronic kidney disease patients manage fluid throughout the spectrum of their condition — beyond dialysis.

HB Biotech has kicked off an equity crowdfunding campaign to raise capital for the launch of its product. Fluid Lock System by HB Biotech fundamentally alters the \$400+ billion kidney care landscape; brings a welcome low-risk tool to help manage fluid overload; and provides a

pathway for everyday folks from communities around the world to become stakeholders in this enterprise.

This round of funding transforms HB Biotech from a stealth startup to a lead player in the cardio renal space with a commercially cleared product that is publicly available so everyone who needs it can get it. It's a very exciting time in their commercialization journey. It's a game changing round. It's the round for the win.

Those interested in creating a reality beyond dialysis that provides much-needed relief from fluid

overload to millions of people can now join HB Biotech's equity crowdfunding campaign on Wefunder: <https://wefunder.com/fluidlock>

WHY EQUITY CROWDFUNDING?

Interest and participation in equity crowdfunding — a.k.a. startup investing — has recently skyrocketed.

It is a hugely successful way to connect small businesses with capital from people who want to invest in great ideas and experience the benefits of ownership.

Since 2018, investments in startups have grown nearly 550% to reach \$486.8 million in 2021.

Startups with minority founders made up 44.6% of all equity crowdfunding deals in 2021 and received 31.5% of total dollars invested, compared to only 2% of VC investments that went to female founders in 2021.

The Wefunder platform, where HB Biotech's offering is hosted, dominates in terms of dollars invested and deals closed.

If you'd like to see HB Biotech's numbers, research, video, or any other details about this exceptional investment opportunity, the whole story is available at wefunder.com/fluidlock

ABOUT WEFUNDER

Home of the Community Round, Wefunder is a Public Benefit Corporation that makes it possible for the general public to invest in startups for as little as \$100. It's angel investing for everyone.

Wefunder means Wefunder Inc and its wholly owned subsidiaries: Wefunder Advisors LLC and Wefunder Portal LLC.

The image is a composite of three promotional graphics for the Fluid Lock System. The top graphic shows a hand in a blue glove holding a white and blue capsule, with the text "Recognized as a medical device". The middle graphic shows a capsule being crushed, with the text "1 capsule = 1 device" and "containing one gram of superabsorbent material". The bottom graphic is a list of improvements: "Improvements in: ✓ Blood pressure, ✓ Body weight, ✓ Ability to breathe, ✓ Heart failure classification", accompanied by a diagram of the human digestive system. Below this is a cover for a "WHITEPAPER" titled "FLUID LOCK SYSTEM Clinical Results Summary" by "HB BIOTECHNOLOGIES CORPORATION".

Wefunder Portal LLC is a member of the Financial Industry Regulatory Authority (FINRA).

ABOUT FLUID LOCK SYSTEM

Backed by science and supported by clinical results, Fluid Lock System is a prescription medical device.

The product is comprised of an encapsulated superabsorbent polymer that is administered orally and is intended as a tool to help manage fluid for heart failure and chronic kidney disease patients.

Clinical studies support that use of the product results in improvements in measures of fluid overload including body weight, blood pressure, ability to breathe, endurance, heart failure classification, and other quality of life measures.

Fluid Lock System brings more ammunition to help kidney patients fight back — and to fight back across the entire disease spectrum — as a first-in-line approach to help slow disease progression, and as a later stage tool to help manage fluid overload in between dialysis treatments as the disease worsens. (These statements not yet evaluated by regulatory authorities.)

A Whitepaper Summary of Clinical Results is available for download at: wefunder.com/fluidlock

ABOUT HB BIOTECHNOLOGIES CORPORATION

HB Biotech is a pre-commercial stage biotechnology company focused on the commercialization of a globally-patented, clinically-proven advancement in cardio renal specialty care — a novel medical device that is intended as a tool for heart failure and kidney disease patients to help manage fluid overload. Beyond dialysis.

With the success of their equity crowdfunding offering, HB Biotech expects its product to be cleared as a medical device for global commercial sale — a game changer. From there, the Company expects to enter a period of high sustainable growth and success, with a value exceeding USD \$2 billion.

HB Biotech is proud to make possible a long-overdue pathway to expand the standard of care for patients with heart failure and kidney disease. The Company welcomes all interested investors to become part of this great success story, and make a clinically significant difference in the lives of millions of people in need.

HIGHLIGHTS & MILESTONES

- First and only kidney product that does not deliver protein to the body.* Protein is toxic for people with chronic kidney disease and can worsen the condition.
- Patented in 40 countries including all 38 member countries of the European Patent Organisation, Canada, and Japan. Pending United States.
- Low-risk tool and market disruptor that delivers benefits to health that are not achieved by other strategies.
- Extensive non-clinical and clinical assets support safety and effectiveness of the product technology.
- Significant manufacturing partnerships with industry titans provide scale, reach, and infrastructure for global brand longevity.

USE OF INVESTMENT PROCEEDS

- Produce commercial product batch.
- Finalize and submit premarket notifications (United States, Canada, Japan, European Union).
- Secure global marketing authorization and clearance.
- Support preparations for commercial stage manufacturing and product launch.
- Support company operations.

HB Biotech thanks you for your interest and consideration, and looks forward to you joining on this journey.

HB Biotechnologies Corporation is testing the waters' to gauge investor interest in an offering under Regulation Crowdfunding. No money or other consideration is being solicited. If sent, it will not be accepted. No offer to buy securities will be accepted. No part of the purchase price will be received until a Form C is filed and only through Wefunder's platform. Any indication of

interest involves no obligation or commitment of any kind.

FORWARD LOOKING STATEMENT

This press release contains statements that are or may be forward-looking statements, including statements that relate to the Company's future prospects, developments and strategies. The forward-looking statements are based on current expectations and are subject to known and unknown risks and uncertainties that could cause actual results, performance and achievements to differ materially from current expectations.

These forward-looking statements are based on assumptions regarding the present and future business strategies of the company and the environment in which it will operate in the future. Each forward-looking statement speaks only as at the date of this press release.

Except as required by law and regulatory requirements, neither the Company nor any other party intends to update or revise these forward-looking statements, whether as a result of new information, future events, or otherwise.

Forward-looking statements or information typically contain statements with words such as "anticipate", "believe", "expect", "plan", "intend", "estimate", "propose", "project" or similar words suggesting future outcomes or statements regarding an outlook. Forward-looking statements or information in this press release include, but are not limited to the Company's current focus, revenue goals, and the benefits on the Company of launching new technology.

Forward-looking statements or information is based on several factors and assumptions which have been used to develop such statements and information, but which may prove to be incorrect. Although HB Biotechnologies Corporation believes that the expectations reflected in such forward-looking statements or information are reasonable, undue reliance should not be placed on forward-looking statements because the Company can give no assurance that such expectations will prove to be correct.
