Some Key Highlights From the Report

The cloud segment is expected to register a significant market revenue growth owing to the fact that cloud-based PLM systems make it easier to implement, upgrade, and customize products.

The design and engineering segment is expected to grow considerably due to continuous digitalization and rapid spread of connected value chains.

The automotive and transportation segment is expected to register a steady growth. Expanding usage of digital manufacturing and integration of IoT in production of smart automobiles is expected to drive market growth in the automotive industry.

The North America is expected to register a considerable growth rate. Market players in the region can invest heavily in new solutions, such as IoT, augmented reality, telecommunication technology, and connected industries due to their strong financial position, providing competitive advantage in the market.

In January 11, 2022, Aras Corporation signed a merger with Minerva Group, a software company that optimizes business and product processes. Through this agreement, Minerva will offer product lifecycle management capability to the Aras platform for medical device and high-tech electronics industries. The company has substantial vertical industry knowledge in manufacturing of automotive, aerospace, defense, and industrial equipment.

The leading contenders in the global Product Lifecycle Management market are listed below:

Siemens AG, Oracle Corporation, Dassault Systemes, Autodesk, Inc., Aras Corporation, IBM, Kalypso, Accenture, Bamboo Rose and Propel
