

BCS Concrete Structures Utilizes OSHA Top 10 Safety Violations for Safety Education

OSHA Published 2022 its Top 10 Safety Violations

AUSTIN, TEXAS, UNITED STATES, January 30, 2023 /EINPresswire.com/ -- [BCS Concrete Structures](#), a leading [commercial concrete contractor](#) in Austin, Texas, today revealed the [OSHA Top Violations for the year 2022](#). The

list shows the previous year's most frequently cited accidents and violations. The findings are expected to educate the BCS workers on proper safety in the field.

Workplace injuries pose a significant risk to a business due to lower productivity, higher medical bills, and delays. These factors can significantly affect a business's bottom line throughout the year. OSHA's safety violation list is intended to identify these higher-risk events and encourages employees and companies to practice more effective safety measures.

The full The Top 10 most frequently cited workplace safety standards are:

- Fall Protection - General
- Hazard Communication
- Respiratory Protection
- Ladders
- Scaffolding
- Lockout/Tagout
- Powered Industrial Trucks
- Fall Protection - Training Requirements
- Personal Protective Equipment (PPE) - Eye and Face Protection
- Machine Guarding

The OSHA list shows that fall protection stayed at the number one spot as the most violated safety standard of 2022. Hazard communication and respiratory protection took the 2nd and 3rd spots, respectively. In their official announcement, BCS also noted that fall protection and personal protective equipment (PPE) contributed the most to BCS' loss of productivity.

OSHA Top 10 Violations by BCS Concrete Structures

BCS plans to use this data for improvement as they prioritize safety education within the workplace through events, courses, and policies, which helps the company increase safety awareness.
