

# Else Labs Leverages Edamam's Recipe Data for its Cutting-Edge Autonomous Cooking Appliances

*Else Labs is using diet and nutrition data from Edamam for recipes in the Oliver App, a companion to its commercial and soon household cooking appliances.*

NEW YORK, NY, US, January 31, 2023 /EINPresswire.com/ -- [Else Labs](#), a company focused on autonomous cooking has partnered with [Edamam](#) to power their recipes and nutrition engine.

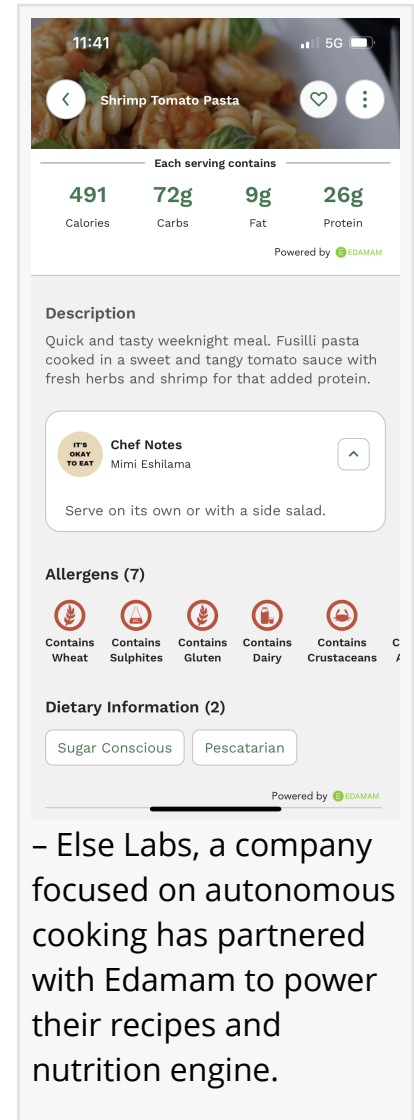

Else Labs develops autonomous kitchen appliances with a unique patented technology which fully automates the cooking process removing the need for an individual or culinary team while producing consistent and high-quality meals.

"We created Oliver to provide people with an autonomous cooking experience, producing high-quality, nutritious meals. Now, with how food and technology are intersecting, the need for transparent nutritional data has become critical. Our partnership with Edamam was the right strategic choice for us to ensure delivery of our holistic approach for the distribution of nutritional information for Oliver made meals," commented Khalid Aboujassoum, Else Labs' Founder and CEO.

Else Labs submits its recipes to Edamam's nutrition analysis engine and uses the returned nutritional data by displaying it in the Oliver App. The key information is shared per serving size, based on the Canadian Nutritional guide: Calories, Carbs, Fat, Protein.

Additionally, Else Labs uses allergen and diet tags produced by Edamam. The Edamam data is key and very valuable for users when selecting a recipe for Oliver to cook.

"Oliver shows how the data produced by Edamam can meaningfully be leveraged by both professional and home chefs. We believe the smart kitchen space is on a growth trajectory and that recipe and food and data will be indispensable for all connected smart kitchen appliances," added Victor Penev, Edamam's Founder and CEO.

Edamam's [Nutrition Analysis API](#) allows companies such as Else Labs to analyze quickly and affordably large numbers of recipes. It produces full nutritional analysis, providing per serving and on a recipe level information about all macronutrients, micronutrients, applicable diets, allergens and other relevant data points, such as meal type, dish type, cuisine, glycemic index and more. Companies using Edamam for nutrition data include The New York Times, Hearst, America's Test Kitchen, and The Food Network.

## About Edamam

Edamam organizes the world's food knowledge and provides nutrition data services and value-added solutions to health, wellness and food businesses. Using a proprietary semantic technology platform, it delivers real-time nutrition analysis and diet recommendations via APIs. Edamam's technology helps customers answer for their clients the perennial question: "What should I eat?"

Edamam's partners and clients include Nestle, Amazon, The Food Network, The New York Times, Microsoft and Barilla. For more information, please visit [www.edamam.com](http://www.edamam.com) or [developer.edamam.com](http://developer.edamam.com).

At Edamam, we believe the smart kitchen space is on a growth trajectory and that recipe and food and data will be indispensable for all connected smart kitchen appliances"

## About Else Labs

Else Labs is building the future of autonomous cooking in every kitchen. Our goal is to drive innovation in food tech. We first invented Oliver by else, a robot chef that replicates stovetop cooking. After receiving so much interest from the commercial industry, we introduced The Oliver Fleet. This is a kitchen solution that is versatile and compact, making your process smooth, efficient, and streamlined. Our mission is to develop autonomous kitchen appliances,

using our patented technologies, to give individuals and culinary teams their time back, with consistent and high-quality meals.

**EDAMAM**  
Food. Data. Health

**WHAT WE DO**  
Edamam offers real-time, highly accurate nutrition analysis of any recipe, food or ingredient list. Clients receive detailed data on all nutrients and tags for 40+ allergen and lifestyle diets for every analyzed meal or food.

**OUR IMPACT**

- POWER NUTRITION**  
Edamam powers nutrition for a number of large clients, including The Food Network, The New York Times, Microsoft, and Barilla.
- FASTER & CHEAPER SOLUTION**  
We save clients both time and money by providing either real-time nutrition analysis via API or licensed data at a fraction of the cost of traditional solutions.
- 5 MILLION RECIPES ANALYZED**  
Edamam has produced analysis for over 5 million recipes and 800,000 foods, including commonly eaten meals and restaurant menu items.

**CHALLENGES WE SOLVE**

- Nutrition analysis is slow, expensive, and is traditionally completed by nutritionists.
- Companies with many recipes or foods need an inexpensive and fast solution.
- Edamam offers an affordable and scalable alternative with human level accuracy.

**HOW WE ARE UNIQUE**

- Our proprietary technology allows us to do real-time, highly accurate nutritional analysis of any meal, food or ingredient list.
- We offer either real-time analysis or licensed data, both at a fraction of the cost of traditional services.

**OUR PRODUCTS AND TECHNOLOGY**

- Real-time nutrition analysis, using natural language processing
- Automated tagging for 130+ nutrients and 40+ allergen/lifestyle diets (paleo, gluten-free, etc.)
- Customized diet and nutrition tagging for clients as driven by business needs

Partners: Barilla, The New York Times, food network, Microsoft, AMERICA'S TEST KITCHEN

Edamam is the premier B2B provider of nutrition data to recipe owners, food media, restaurants and catering companies.

The graphic is a white rectangular box with a green header and footer. The header features the Edamam logo (a green circle with three horizontal lines) and the text "EDAMAM Food. Data. Health". Below the header is a green bar with the text "WHAT WE DO" and "Edamam offers meal recommendation and nutrition analysis solutions to food, health and wellness companies. Clients either integrate with one of our APIs for real-time data service or license targeted datasets." The main body of the graphic is divided into several sections: "OUR IMPACT" with three columns of icons and text; "CHALLENGES WE SOLVE" with a list of three points; "HOW WE ARE UNIQUE" with a list of two points; and "OUR PRODUCTS AND TECHNOLOGY" with a list of three bullet points and three smartphone app screenshots. At the bottom, there is a grey bar with the text "Edamam Powers Nutrition Data Solutions for Food, Health and Wellness Businesses".

**EDAMAM**  
Food. Data. Health

**WHAT WE DO**  
Edamam offers meal recommendation and nutrition analysis solutions to food, health and wellness companies. Clients either integrate with one of our APIs for real-time data service or license targeted datasets.

**OUR IMPACT**

- POWER NUTRITION**  
Edamam powers nutrition for a number of large clients, including Nestle, Amazon and The Food Network.
- FASTER & CHEAPER SOLUTION**  
We save clients both time and money by providing real-time data service at fraction of the cost of traditional solutions.
- 40,000 BUSINESS SUBSCRIBERS**  
Our APIs have over 40,000 subscribers, building meal recommendation, food logging and nutrition data apps.

**CHALLENGES WE SOLVE**

- 1 Demand for real-time, accurate nutrition data and personalized meal recommendations is growing.
- 2 Food, health and wellness businesses need scalable, fast and affordable ways to meet this demand.
- 3 Current solutions are either manual (slow and expensive) or scalable but incomplete and inaccurate.

**HOW WE ARE UNIQUE**

- 1 We offer fast, reliable, always on data services at a fraction of the cost of existing nutrition data providers.
- 2 Our meal recommendation and nutrition analysis leverage the largest database of recipes and foods and proprietary search and natural language technology.

**OUR PRODUCTS AND TECHNOLOGY**

- Real-time nutrition analysis, using natural language processing
- Database of 5 million recipes and 750K foods, nutritionally tagged and analyzed for all nutrients, diets, chronic conditions
- Diet recommendation engine, leveraging proprietary search algorithms
