Key Highlights in Report

Hardware segment is expected to lead in terms of revenue expansion at a CAGR of 47.5% during the forecast period. This high growth rate can be attributed to rising usage of qubits in quantum

computing to program and manage qubits; an optimized hardware approach with significant standard hardware is necessary.

The cloud-based quantum computing segment is projected to account for largest market share over the forecast period due to growing use of cloud-based quantum computing for new drug discovery, risk management, supply chain optimization, and financial trading.

In terms of revenue contribution to the global quantum computing enterprise industry market, the simulation segment is projected to lead during the forecast period as a result of increasing application of quantum computing simulation for electric battery production and for the identification of chemical compounds.
