Surgical treatments include organ implant, cardiovascular, and orthopaedic procedures all require medical adhesives and sealants to stop blood loss. Medical adhesives and sealants promote wound healing naturally and stop air or liquid leaks during and after operations. For instance, an organ transplant requires a significant body incision. In order to avoid issues after surgery, such as bleeding, wound infection, and others, post-surgery wounds are sealed with the use of surgical sutures and staples. In this situation, medical adhesives and sealants can help to prevent such complications.
