Segment Analysis

1. The Ibuprofen segment held the largest share in the Degenerative Disc Disease Treatment Market in 2019 and is estimated to grow at a CAGR of 6.3% during the forecast period 2020-2025. Ibuprofen is a medication in the nonsteroidal anti-inflammatory drug class that is used for treating pain, fever and inflammation. This includes painful menstrual periods, migraines, and rheumatoid arthritis. Naproxen also known as Aleve is a nonsteroidal anti-inflammatory drug (NSAID) used to treat pain, menstrual cramps, and inflammatory diseases such as rheumatoid arthritis and fever and is available in immediate and delayed-release formulations. The onset of effects is within an hour and lasts for up to twelve hours. Naproxen sodium is available as both an immediate-release and an extended-release tablet.

2. Occupational Therapy segment held the largest share of the Degenerative Disc Disease Treatment Market in 2019. Occupational therapy is for back pain and focuses on using proper body mechanics which include using larger joints in movement, conserving energy by balancing work and rest, and listening to pain signals to avoid overexertion. Specific movements make the muscles in the neck and back stronger and more flexible. This supports the spine. In most cases, physical therapy and pain medication are enough for long-term relief.

3. Europe dominated the degenerative disc disease treatment market in 2019 with a share of more than 39%, followed by Asia Pacific owing to the increasing suffering from lumbar degenerative spine diseases and lower back pain. However, Asia-Pacific is estimated to grow at a higher CAGR during the forecast period 2020-2025 . This is attributed to the increasing population that is vulnerable to diseases along with the increasing usage of non-surgical methods for treating degenerative disc disease treatment.
