[Trending Polyphenols Market Trend](#)

Product launches have emerged as a key trend gaining popularity in the polyphenols market. Many companies operating in polyphenols are developing new products with emerging technologies to meet the industry demand and strengthen their market position across the globe. For instance, in July 2022, Genosa, a Spain-based company engaged in the production of olive fruit-derived natural extracts high in hydroxytyrosol, launched phenol-rich olive fruit extract. The amount of polyphenols in Hytolive Infinity is standardized by up to 25% and amounts to about 1,000 parts per million (ppm). Because it doesn't contain any emulsifiers, additives, or solvents, the company's modified process technology allows it to produce high purity hydroxytyrosol, which is more stable and adaptable.

[Polyphenols Market Segments](#)

- By Type: Flavonoids, Phenolic Acids, Stilbenes, Lignans
- By Source: Fruits, Vegetables, Whole Grains
- By Application: Food & Beverage, Dietary Supplement, Cosmetics, Pharmaceuticals

The polyphenols refer to micronutrients found naturally in plants. Polyphenols are found in many supplements and can easily get into the diet through fruits, vegetables, teas, and spices. There are about 8,000 different forms of polyphenols, including flavonoids like quercetin and catechins found in fruits. Polyphenols may help prevent blood clots, lower blood sugar levels, and reduce the risk of heart disease.

Polyphenols Global Market Report 2023 from TBRC covers the following information:
