Trending Chemical As A Service Market Trend

Strategic partnerships are a key trend gaining popularity in the chemical as a service global

market. Major companies operating in chemicals as a service are undergoing partnerships to strengthen their position in the market. For instance, in May 2022, Sphera®, Chicago-based a leading global provider of Environmental, Social, and Governance (ESG) performance and risk management software, data, and consulting services, partnered with BASF Germany-based chemical company. The collaboration makes BASF's methodology and digital solution for automated product carbon footprint (PCF) calculation available in Sphera's Life Cycle Assessment (LCA) software solutions. LCAs assist businesses in better analyzing the effects of their supply chain on their overall carbon footprint and making informed decisions on their path to net zero.

### [Chemical As A Service Market Segments](#)

By Type: Chemical Management Services, Chemicals Leasing

The chemicals as a service (CaaS) refer to the transition in chemical organizations' business models from selling a product (paid in weight or volume) to selling a service (paid in proportion of a certain service level). Customers benefit from the cheaper initial investment, predictable costs, and less fuss with product maintenance, while suppliers benefit from increased margins through additional sales of value-added services in the service package (such as insurance or maintenance), scale effects, and customer lock-in.

Chemical As A Service Global Market Report 2023 from TBRC covers the following information:

Market size data for the forecast period: Historical and Future

Market analysis by region: Asia-Pacific, China, Western Europe, Eastern Europe, North America, USA, South America, Middle East and Africa.
