Segmental Analysis:

1. Increase in cotton consumption for textile production will create more usage of textile chemicals such as sodium hydroxide and peracetic acid in Mexico. This will provide a positive impact on the growth of LATAM textile chemicals industry.

2. Brazil accounted for approximately 62% of LATAM textile chemicals market share in 2021. The country is one of the major producers of textiles in Latin America besides being largest automotive producer. The economic development of Brazil has increased the industrial productivity of the Latin American country.

3. Increase in market size on account of growing consumption of apparels textile items will create more usage of textile chemicals in Latin American country like Peru during manufacturing and processing of clothing & apparel items. This will positively impact growth of LATAM textile chemicals industry.

4. Production of textile includes usage of various harmful chemicals which when released in environment as waste, causes pollution problems. Moreover, exposure to such chemicals can cause serious allergic reaction, skin diseases and irritation to respiratory track

Competitive Landscape:

The top 5 players in the LATAM Textile Chemicals Industry are -

1. Braskem SA
2. Evora SA
3. Kaltex SA

4. Vicunha Textil SA
5. Coteminas SA
