Cathepsin Inhibitors Market

All animals and other organisms include cathepsins, a family of lysosomal proteases (enzymes that break down protein), which are essential for cellular protein turnover. Serine, aspartic, and cysteine proteases are members of the cathepsin family. The cathepsins D and E are members of the aspartyl protease class. The cathepsins B, L, H, K, S, and O are members of the cysteine protease class. The serine protease class is a part of cathepsin G. The creation of innovative cathepsin inhibitors for the treatment of illnesses including cancer, traumatic brain injury, Ebola infection, and others is currently the focus of numerous research and development activities. At this time, there are no authorised cathepsin inhibitors on the market.
